1969 Buick 350 V8 Engine Buick built a 350 engine starting in 1968, joining GM in the family of small-block V8 engines. Buick's 350 was different than the rest of GM's 350 engines. It had a wider bore inside the engine, which made it wider, and it had an external oil pump, which was unusual for engines at the time. The 350 was used from 1968 to 1980 in large Buicks. 350 Buick Engine ...

The Buick V8 is a family of V8 engines produced by the Buick division of General Motors between 1953 and 1981. The first version replaced the Buick straight-eight. Displacements vary from 215 cu in (3.5 L) (for the division's unique all-aluminum early 1960s engine) to 455 cu in (7.5 L) for its last big block in 1976.

Buick V8 engine - Wikipedia

GM has long been the master of badge engineering. Take this 1969 Buick GS 350 for example. It ' s a performance version of the Buick Skylark which is really just a rebadged Chevelle. While the body and chassis are essentially identical, there is one major difference that sets the Buick apart from it ' s GM brother and that ' s its 350 V8.

American Performance V-8 Specs: 1963-1974 (Second Edition) provides extensive information on all the performance V-8 engines in Muscle Cars, Pony Cars, and Supercars. Also included are sports cars such as Corvette, Cobra, GT40, and Pantera. Numerous tables and charts display engine information in a clear and concise style. This data-packed book is a valuable resource for automotive enthusiasts. Says automotive writer Diego Rosenberg: " This book is laid out in a manner that embraces your interest and keeps you entertained with historical takes on the era. It ' s a seminal piece of automotive history that should be a mandatory reference for every enthusiast. " Each chapter is dedicated to a manufacturer and contains five sections: (1) Engine specs including bore, stroke, horsepower, torque, compression ratio, carburetion, rod length, bore spacing, block height, valve size, journal diameters, and firing order, (2) Engine application charts for American muscle car and sports car models, (3) Road test results from automotive magazines of the 1960s and 1970s (over 1,000 total tests), (4) Additional engine details and historical background, and (5)

Gallery of color photographs (over 400 total photographs).

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “ need for speed ” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960 – 1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make ’ s status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year ’ s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955 – 1957 Chevrolets, the “ Forward Look ” Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company ’ s models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
