In Western Ways, for the first time, the "foreign schools" in Rome and Athens, institutions dealing primarily with classical archaeology and art history, are discussed in historical terms as vehicles and figureheads of national scholarship. By emphasising the agency and role of individuals in relation to structures and tradition, the book shows how much may be gained by examining science and politics as two sides of the same coin. It sheds light on the scholarly organisation of foreign schools, and through them, on the organisation of classical archaeology and classical studies around the Mediterranean. With its breadth and depth of archival resources, Western Ways offers new perspectives on funding, national prestige and international collaboration in the world of scholarship, and places the foreign schools in a framework of nineteenth and twentieth century Italian and Greek history.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.
