...

Employment in computer and information technology occupations is projected to grow 11 percent from 2019 to 2029, much faster than the average for all occupations. These occupations are projected to add about 531,200 new jobs. Demand for these workers will stem from greater emphasis on cloud computing, the collection and storage of big data, and information security.

## Computers and Information Technology - Information ...

What Is Information  
Technology? A 1958 article  
in Harvard Business Review  
referred to information  
technology as consisting of  
three basic parts:  
computational data  
processing, decision  
support, and business  
software. This time period  
marked the beginning of IT  
as an officially defined  
area of business; in fact,  
this article probably coined

## A Basic Introduction to Information Technology (IT)

Information technology is the use of computers to store, retrieve, transmit and manipulate data or information. IT is typically used within the context of business operations as opposed to personal or entertainment technologies. IT is considered to be a subset of information and communications technology. An information technology system is generally an information system, a communications system or, more specifically speaking, a computer system -
