At Harvard Medical School, a survey of first and second year students reported that 57.2% of students attend lectures, whilst 29.9% watch them online [19]. Another survey of 190 medical students from New York University reported that 80% of students attend lectures and 20% use mainly online or computer based learning [22].

Medical students: what educational resources are they ...

Responses are provided on a 5-point Likert scale and subscale scores can range from 5 to 25. Higher values suggest greater motivation to continue training in medical school. Data analysis. All data was exported from Google Survey to Excel v365 (Microsoft Corporation, Redmond, WA). All analyses were performed using SPSS v25 (IBM Corporation, Armonk, NY).

Assessment of burnout in medical students using the ...

Request AAMC Data. Medical student indebtedness has grown over time and is driven, in part, by interest rates and the cost of attending medical school. Traditional measures of medical school attendance cost include tuition and fees for first-year students (which do not include living expenses) and the cost of attendance for first year students (which does not reflect that the final two academic years of medical school often have higher living expenses).

"This book is written for all medical students and is ideal for OSCE practice, during ward rounds and clinical years ..." -- BOOK COVER.

Data interpretation questions based on clinical cases are a popular means of testing medical students both during undergraduate studies and as an element of finals examinations. Written by a small team of authors with extensive teaching experience, 100 Cases in Medical Data Interpretation provides invaluable guidance from lecturers who understand from personal experience that detailed and accurate explanations are the key to successful revision. This book presents 100 cases arranged by specialty area—radiology, clinical chemistry, haematology and cardiology—as well as a random section of miscellaneous cases. Questions accompanying each case prompt the reader to consider how the data presented might be correctly understood. A clear discussion of how the correct answer was reached, with boxed highlights and bullet lists of key points, makes this book an excellent learning aid during all stages of clinical studies, and particularly while preparing for medical finals.

The ability to interpret and synthesise medical data is essential for doctors, yet it is a skill which can be difficult to master. Data Interpretation Made Easy focuses on developing this skill by presenting an array of case-based themes considering interpretation of blood results, X-rays, ECGs and CT images in medicine with discussion of evidence-based practice. The concise, list-based text aids easy comprehension and images provide the much needed link from raw data to evidence-based care and management. This highly practical book is essential reading for undergraduate medical students preparing for examinations. It is also ideal for Junior Doctors needing a succinct guide to data interpretation for everyday use.

Third edition presenting latest techniques for accurate interpretation of clinical data. Includes more than 500 cases with descriptive text, questions, answers and explanations. Previous edition published in 2010.

Written by senior clinicians across a range of specialties, Data Interpretation for Medical Finals: Single Best Answer Questions is the perfect way to prepare for data interpretation assessments and clinical practice. Featuring over 200 questions on key topics in medicine, each question is set around an image or investigation, such as an X-ray, CT scan, or blood film, and tests identification and interpretation of the data provided. Thorough explanation of the correct and incorrect answers helps you learn from mistakes. The questions reflect current exam question style and incorporate high quality images, many of which are annotated, and are presented in full colour throughout. Data Interpretation for Medical Finals will help build the confidence of all medical students, and Foundation Doctors, as it encourages application of investigation results to clinical decision making.

Calm those exam nerves with 'EMQs and Data Interpretation Questions in Surgery' - the best way for you to assess your understanding of surgery while practising your exam technique. Presenting both Extended Matching Questions and Data Interpretation Questions in the same volume, this 'all in one' book is an ideal revision resource in surgery for medical students. Since the publication of 'EMQs in Clinical Medicine' there has been an ever-increasing use of EMQs in finals; 'EMQs and Data Interpretation Questions in Surgery' continues the aim of covering the most commonly questioned EMQ themes and providing detailed explanations for study and revision. It contains EMQs that cover the major general and specialist surgical specialties along with anaesthesia and critical care. Data Interpretation Questions are a new and popular means of testing practical knowledge in a format representative of clinical practice; illustrated with a range of data, including test results, imaging and clinical photographs, these questions give a useful insight into this new examination format. With the increasing popularity of EMQs and DIQs as the format of choice in medical finals, 'EMQs and Data Interpretation Questions in Surgery' is an invaluable examination study aid.

The management of critically ill patients not only involves a thorough daily review of investigations and monitoring. A detailed knowledge and understanding of data is crucial in the day-to-day management of patients in intensive care. With over 100 data sets composed of a brief history, relevant clinical findings, investigation and monitoring results, Venkatesh provides a source of real clinical data, with questions and answers, enabling you to test and develop your interpretation skills. Answers with explanations follow each question, providing instant access to the correct interpretation and additional information to enhance the readers understanding. Important review for anesthesia and critical care personnel who need to know this information for practice or for exams.

Modern practical medicine requires high tech in diagnostics and therapy and in consequence in education. All disciplines use computers to handle large data bases allowing individual therapy, to interpret large data bases in form of neuronal signals, help visualization of organs during surgery. This book contains chapters on personalised therapy, advanced diagnostics in neurology, modern techniques like robotic surgery (da Vinci robots), 3D-printing and 3D-bioprinting, augmented reality applied in medical diagnostics and therapy. It is impossible without fast large scale data mining in both: clinical data interpretation as well as in hospital organization including hybrid surgery rooms and personal data flow. The book is based on a course for medical students organized in the editor's department. Every year, around 300 international undergraduate medical students take the course.

The only book dedicated to the College of Emergency Medicine's Membership examination, this book contains numerous questions and answers, together with data sets and clinical examples to help prepare candidates taking part B of this and other higher examinations in emergency medicine. All trainees wishing to pursue a career in Emergency Medicine have to pass the College of Emergency Medicine's own membership examination (MCEM) to enter training and pass the Fellowship examination (FCEM) to complete their Certificate of Specialist Training (CST). This book is a study guide which can be used in conjunction with standard emergency medicine texts. It follows the MCEM syllabus exactly and each chapter has three key parts: core facts which supplements revision for parts A and B, clinical scenarios, including data, which can be used to prepare for part B, and sample answers for questions. This book prepares candidates for examination success in part B, the data interpretation part of the MCEM examination. The authors are doctors all dedicated to the acute or emergency setting and who have collated extensive material to help in candidates' preparation for the MCEM examination. They have run a successful revision course for candidates taking the examination.
