Essentials of Management Information Systems: Organization and Technology in the Networked Enterprise (Fourth Edition) is based on the premise that it is difficult, if not impossible, to manage a modern organization without at least some knowledge of information systems—they are, how they affect the organization and its employees, and how they can make businesses more competitive and efficient. Information systems have become essential for creating competitive firms, managing global ...

Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

An in-depth look at how today's businesses use information technologies. Many businesses look for candidates who know how to use information systems, making a general understanding of information systems an asset to any business professional. Laudon and Laudon emphasize how business objectives shape the application of new information systems and technologies. The ninth edition focuses on currency and cutting-edge topics.

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Student Value Editions also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. For Student Value Editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title-including customized versions for individual schools-and registrations are not transferable. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering platforms. For introductory courses in Information Systems or Management Information Systems, Connect essential MIS concepts to everyday life Essentials of MIS is an in-depth look at how today's businesses use information technologies and systems to achieve their corporate objectives. Current real-world business cases illustrate how companies have identified, and ultimately solved, key business challenges using information systems and technologies. Through the use of Essentials of MIS, you will be able to participate in, and even lead, management discussions of information systems for a firm. The 13th Edition consists of 12 chapters with hands-on projects that cover the most essential topics in MIS. In addition to the core text, this edition includes a Video Case Package consisting of 28 video case studies and 10 instructional videos to illustrate business uses of information systems, explain new technologies, and explore concepts. The knowledge and information in this book will be most valuable throughout your business career. Reach every student by pairing this text with MyLab MIS MyLab(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. And, with Decision-Making Mini Simulations and Auto-Graded Excel and Access Projects, students learn how MIS concepts will help them succeed in their future careers.

This textbook introduces the various roles of computers in business management. The fourth edition more fully explores the electronic business uses of the Internet for the management of a firm as well as electronic commerce. Annotation copyrighted by Book News, Inc., Portland, OR

Essentials of Management Information Systems, 2/e, prepares students of the constantly changing demands of information systems management - first by relating MIS to management, the organization, and technology, focusing on the importance of integrating these elements; secondly by tracking emerging technologies and organizational trends; thirdly by consistently using examples taken from real businesses both domestic and foreign. The Second Edition explores the recent, rapid expansion of INTERNET related technologies and the impact they are having on how business is being done. The CD ROM-based Multimedia Edition offers all the text content, including figures, graphs, illustrations, and photos plus added multimedia dimensions of audio, video, animations, and an interactive study guide. Students may use the traditional text or the CD ROM independently or use the CD in conjunction with the text as a multi-media learning tool.

For undergraduate and graduate MIS courses. An in-depth look at how today's businesses use information technologies. Many businesses look for candidates who know how to use information systems, making a general understanding of information systems an asset to any business student. Laudon and Laudon continue to define the MIS course for all business majors by emphasizing how business objectives shape the application of new information systems and technologies.

For introductory undergraduate courses in Information Systems taught in MIS, IS, CIS, Business and Management departments. This brief text is ideal for courses on quarter systems and those that combine a MIS text with hands-on software, projects, or case studies. These authoritative authors continue to define the MIS course by emphasizing how business objectives shape the application of new information systems and technologies and integrating a career orientation that demonstrates the relevance of information systems to all business students regardless of their major.

Directed primarily toward undergraduate CIS/MIS college/university majors, this text also provides practical content to current and aspiring industry professionals. Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision making in an exciting and interactive manner. Note: This is the standalone book, if you want the book/access card order the ISBN below: 0133130789 / 9780133130782 Management Information Systems Plus MyMISLab with Pearson eText -- Access Card Package Package consists of: 0133050696 / 9780133050691 Management Information 13/e 0133058328 / 9780133058321 myMISlab with Pearson eText -- Access Card -- for Management Information Systems

Appropriate for both undergraduate and MBA students, this textbook examines the role of information systems in business and management. The authors describe the organizational and technical foundations of information systems, decision support systems, and the process of redesigning an organization. The fifth edition is reorganized to focus on the use of the internet to digitally enable business processes. Annotation copyrighted by Book News, Inc., Portland, OR
