This laboratory guide includes instructions for the dissection of the fetal pig. Students follow the descriptions of the organs and use other resources to locate them on their specimen. Students label diagrams of the pig showing the digestive system, urinary, reproductive and circulatory system. This is considered a more advanced dissection than the frog and is reserved for honors students in biology.

Fetal Pig Dissection Guide - The Biology Corner

Reading: Fetal Pig Dissection. The fetal pig that you will dissect has been injected with a colored latex (rubber) compound. The arteries have been filled with red latex and the veins with blue. An incision was made on the side of the neck to enable the injections. The incision can be seen in the first photograph below.

Reading: Fetal Pig Dissection I Biology II Laboratory Manual

On the belly you will see the umbilical cord which connected the fetal pig to its mother's placenta. On either side of the umbilical cord you may see mammary papillae, little nipples that will turn into teats in female pigs. 2. Determine if your specimen is male or female by looking closely at the umbilical cord area. If the pig is male, it will have a small urogenital opening immediately behind the umbilical cord.
