Philosophers have always enjoyed asking awkward and provocative questions, such as: What is the nature of reality? What are human beings really like? What is special about the human mind and consciousness? Are we free to choose who we are and what we do? Can we prove that God exists? Can we be certain about anything at all? What is truth? Does language provide us with a true picture of the world? How should we behave towards each other? Do computers think? "Introducing Philosophy" is a

Illustrated INTRODUCING guide to the pre-eminent philosopher of the Enlightenment. Immanuel Kant laid the foundations of modern Western thought. Every subsequent major philosopher owes a profound debt to Kant's attempts to delimit human reason as an appropriate object of philosophical enquiry. And yet, Kant's relentless systematic formalism made him a controversial figure in the history of the philosophy that he helped to shape. Introducing Kant focuses on the three critiques of Pure Reason, Practical Reason and Judgement. It describes Kant's main formal

concepts: the relation of mind to sensory experience, the question of freedom and the law and, above all, the revaluation of metaphysics. Kant emerges as a diehard rationalist yet also a Romantic, deeply committed to the power of the sublime to transform experience. The book explores the paradoxical nature of his ideas and explains the reasons for his undiminished importance in contemporary philosophical debates.

events of the 20th century. Hegel's influential writings on philosophy, politics, history and art are parts of a larger systematic whole. They are also among the most difficult in the entire literature of philosophy. Introducing Hegel guides us through a spectacular system of thought which aimed to make sense of history. The book also provides new perspectives on contemporary postmodern debates about 'metanarratives' (Lyotard) and the 'end of history' (Fukuyama). It is an ideal introduction to this crucial figure in the history of philosophy, and is indispensable for anyone trying to understand such key modern thinkers as Marx, Lacan, Satre and Adorno.

The works of French philosopher Alain Badiou range from novels, poems, “romanopéras” and popular political treatises to elaborate philosophical arguments engaging with mathematical theory. Throughout all of his writings, there is a staunch commitment to emancipatory politics and radical change through fidelity to what he calls the “event” and its “truth”. Badiou’s famous, or infamous, philosophy of emancipation is faithful to the communist truth, the universal idea of a collective life, but he also claims that “philosophy is always a biography of the philosopher”. Introducing Alain Badiou is an elegantly written and crisply illustrated

'Place in garden, lawn, to beautify landscape.' When Don Featherstone's plastic pink flamingos were first advertised in the 1957 Sears catalogue, these were the instructions. The flamingos are placed on the cover of this book for another reason: to start us asking questions. That's where philosophy always begins. Introducing Aesthetics and the Philosophy of Art is written to introduce students to a broad array of questions that have occupied philosophers since antiquity, and which continue to bother us today- questions like: - Is there something special about something's being art? Can a mass-produced plastic

bird have that special something? - If someone likes plastic pink flamingos, does that mean they have bad taste? Is bad taste a bad thing? - Do Featherstone's pink flamingos mean anything? If so, does that depend on what Featherstone meant in designing them? Each chapter opens using a real world example - such as Marcel Duchamp's signed urinal, The Exorcist, and the ugliest animal in the world - to introduce and illustrate the issues under discussion. These case studies serve as touchstones throughout the chapter, keeping the concepts grounded and relatable. With its trademark conversational style, clear explanations, and wealth of supporting features, Introducing Aesthetics and the Philosophy of Art is the
