Your guide to making better decisions

Read Online Judgment Calls Twelve Stories Of Big

Despite the dizzying amount of data at our disposal today—and an increasing reliance on analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the

authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You've read *The Wisdom of Crowds* and *Competing on Analytics*. Now read *Judgment Calls*. You, and your organization, will make better decisions.

we're talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader's judgment determines the fate of the entire organization. That's why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a

powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include:

- Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company.
- Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system.
- Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate

his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you're running a small department or a global corporation, Judgment will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can

The New York Times bestselling master of mystery and suspense, J.A. Jance—whom the *Chattanooga Times* ranks “among the best, if not the best”—brings back her enormously popular series protagonist, Cochise County Sheriff Joanna Brady. With *Judgment Call*, Jance achieves a new high in crime fiction, as Brady wrestles with her conflicting roles of law officer and mother when her daughter discovers the murdered body of the local high school principal, and the ensuing investigation reveals secrets no parent wants to hear. At once a breathtaking recreation of the rugged landscape of the American Southwest, a moving story of a mother’s concerns for her endangered child, and thrilling

masterwork of brutal crime and expert detection, Judgment Call is prime J.A. Jance, a treat for anyone who loves a good cop story wrapped around a superior family drama.

An expert explains how the conventional wisdom about decision making can get us into trouble—and why experience can't be replaced by rules, procedures, or analytical methods. In making decisions, when should we go with our gut and when should we try to analyze every option? When should we use our intuition and when should we rely on logic and statistics? Most of us would probably agree that for important decisions, we should follow certain guidelines—gather as much information as possible, compare the options, pin down the goals before getting started. But in practice we make some of our best decisions by adapting to

circumstances rather than blindly following procedures. In *Streetlights and Shadows*, Gary Klein debunks the conventional wisdom about how to make decisions. He takes ten commonly accepted claims about decision making and shows that they are better suited for the laboratory than for life. The standard advice works well when everything is clear, but the tough decisions involve shadowy conditions of complexity and ambiguity. Gathering masses of information, for example, works if the information is accurate and complete—but that doesn't often happen in the real world. (Think about the careful risk calculations that led to the downfall of the Wall Street investment houses.) Klein offers more realistic ideas about how to make decisions in real-life settings. He provides many examples—ranging from airline pilots and weather forecasters to sports

U.S. Marshal Jake Taylor has seen plenty

Iraq than face his next assignment:
protection detail for federal judge Liz

possible suicide. How can Jake be

despair? As the danger mounts and Jake gets to know Liz better, his feelings slowly start to change. When it becomes clear that an unknown enemy may want her dead, the stakes are raised. Because now both her life--and his heart--are in mortal danger. Full of the suspense and romance Irene Hannon's fans have come to love, Fatal Judgment is a thrilling story that will keep readers turning the pages late into the night.

From the Nobel Prize-winning author of Thinking, Fast and Slow and the coauthor of Nudge, a revolutionary exploration of why people make bad judgments and how to make better ones--"a tour de force" (New York Times). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two judges in the same courthouse give markedly different sentences to people

who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine that the same doctor, the same judge, the same interviewer, or the same customer service agent makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the

time, individuals and organizations alike are unaware of it. They neglect noise.

With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking New York Times bestsellers, *Noise* explains how and why humans are so susceptible to noise in judgment—and what we can do about it.

Why do smart and experienced leaders make flawed, even catastrophic, decisions? Why do people keep believing they have made the right choice, even with the disastrous result staring them in the face? And how can you be sure you're making the right decision--without the benefit of hindsight? Sydney Finkelstein, Jo Whitehead, and Andrew Campbell

show how the usually beneficial processes of the human mind can become traps when we face big decisions. The authors show how the shortcuts our brains have learned to take over millennia of evolution can derail our decision making. Think Again offers a powerful model for making better decisions, describing the key red flags to watch for and detailing the decision-making safeguards we need. Using examples from business, politics, and history, Think Again deconstructs bad decisions, as they unfolded in real time, to show how you can avoid the same fate.

In an era of rapid change, uncertainty, and hyperpartisanship, when wicked problems abound, tools for solving public problems are more essential than ever. The authors lay out a new theory for collaborative practice in planning, public administration, and public policy. Planning with Complexity provides both theoretical underpinnings and extensive case material on collaboration and offers ways of understanding and conducting effective practice. Collaborative rationality means collaboration that is inclusive, informed, grounded in authentic dialogue, and that results in wise and durable outcomes. The scholar-practitioner author team builds on

more than 40 years of research, teaching, and practice addressing environmental issues, housing, and transportation. This second edition updates the case studies and adds new examples reflecting the global spread of collaborative practices. It builds on insights that have recently emerged in the literature. More than 75 new references have been incorporated, along with new tables. This book is essential for students, educators, scholars, and reflective practitioners in public policy fields in the 21st century.
