This book provides an essential overview of sustainable development research in Mexico. It discusses the empirical research methods and findings, as well as practical initiatives and projects being pursued in Mexico and other countries in the region. Although a number of Mexican universities are now conducting high-quality research on matters related to sustainable development, there are few publications that offer a multidisciplinary overview of research efforts for a broader audience. This book addresses that gap in the literature, providing researchers at Mexican universities – including those from other countries working in Mexico – with an opportunity to present their work, i.e. curriculum innovations, empirical work, activities, case studies, and practical projects. As such, it fosters the exchange of information, ideas and experiences, successful initiatives and best practices.

Beginning Google Maps Mashups with Mapplets, KML, and GeoRSS is a beginner's guide to creating web mashups using Google mapping technology. Serves as a single-source primer to displaying data on Google Maps Covers both Mapplets and the Google Maps API Provides everything you need to start participating in the geographic Web What you'll learn "Mash up" GeoWeb services onto a Google map Package your mashup as a mapplet and publish it to maps.google.com Enhance your map with driving directions, local search, map advertising, and more Discover common Google-mapping mistakes to avoid Find out how and when to geocode existing data into mappable coordinates Deliver your own data as GeoXML Who this book is for This book is for web designers and developers who have not worked with Google Maps or geographic data before. A working knowledge of HTML is required, and some programming experience is beneficial.

This book constitutes the proceedings of the 6th Conference on Information Technologies and Communication of Ecuador "TIC-EC", held in Riobamba City from November 21 to 23, 2018, and organized by Universidad Nacional del Chimborazo (UNACH) and its Engineering School, and the Ecuadorian Corporation for the Development of Research and Academia (CEDIA). Considered as one of the most important ICT conferences in Ecuador, it brought together international scholars and practitioners to discuss the development, issues and projections of the use of information and communication technologies in multiple fields of application. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: • Communication networks • Software engineering • Computer sciences • Architecture • Intelligent territory management • IT management • Web technologies • ICT in education • Engineering, industry, and construction with ICT support • Entrepreneurship and innovation at the Academy: a business perspective The authors would like to express their sincere gratitude to the invited speakers for their inspirational talks, to the authors for submitting their work to this conference, and the reviewers for sharing their experience during the selection process.

No es sólo un recorrido por la historia del motor de búsqueda: además ahonda en la lógica de empresa de Google, la posición y las prácticas de la compañía como principal puerta de acceso al conocimiento en internet, y en las posibles consecuencias de continuar alimentando la mayor base de datos del mundo. Larry Page y Sergey Brin concibieron Google con el propósito de indexar el contenido de la red para hacerlo accesible a todo el mundo. De aquella primera intención, nacida hace ya quince años en un despacho de la universidad de Stanford surgió, además del potente motor de búsqueda, la mayor base de datos generada hasta el momento. La puerta de acceso a internet más popular del planeta es ahora también una compañía privada, con ánimo de lucro en expansión, que pone continuamente sobre la mesa nuevas aplicaciones a disposición de sus usuarios y adquiere y almacena información detallada sobre ellos. Si Google lo sabe todo acerca nosotros, quizás sea conveniente conocerlo un poco más a él. -Explicado de manera clara, sencilla y breve. -Aporta las ideas básicas para conocer qué es Google, cómo funciona y cuáles son los principales argumentos que han hecho posible su éxito.
