Medieval Colours

In medieval times dyeing was done with color obtained from plants. This is called natural dyeing. Most of these plant dyes were locally grown and processed. In the 9th century Charlemagne had decreed the cultivation of flax, madder, and woad. Two of these dye plants—madder and woad—produce orange-red and blue respectively.

Medieval Dyes and Dyeing | The Bayeux Tapestry

Studies of medieval textiles and manuscripts determine that about 7% of sheep would be brown or black in color. Wool takes dye fairly well and will result in brighter colors even without an extra step of an ammonia wash.

reality check - What color dyes would be available to the ...

In medieval Europe, purple, violet, murrey and similar colors were produced by dyeing wool with woad or indigo in the fleece and then piece-dyeing the woven cloth with red dyes, either the common madder or the luxury dyes kermes and cochineal. Madder could also produce purples when used with alum.
