PostgreSQL Administration

PostgreSQL is a powerful, open source object-relational database system. A database administrator's (DBA) primary job is to ensure that data is available, protected from loss and corruption, and easily accessible as needed. The PostgreSQL administration covers some of the most important PostgreSQL database server administration activities.

PostgreSQL Database Administration (DBA) for Beginners | Udemy

As with everything that contains valuable data, PostgreSQL databases should be backed up regularly. While the procedure is essentially simple, it is important to have a clear understanding of the underlying techniques and assumptions. There are three fundamentally different approaches to backing up PostgreSQL data:
