Are you looking for a suitable but reasonably priced CCTV system for your home and business? But you get confused by a lot of technical information that you have no clue about. Don't worry, purchase a copy today and you won't regret! This book is an end user's guide to learning the basics of CCTV security technology and what to look for when buying and installing a system. Filled with insights from installers and vendors. It is designed to help new and experienced users alike learn about the features available and how they work. Many end-users find manuals from manufacturers to be too technical or to be filled with sales material. This book examines all the popular technologies of today and examines the pros and cons of each. In addition to learning how to buy the right equipment, This book teaches users about installing, configuring, & troubleshooting their CCTV security video cameras. This book is intended as an end user's guide to understanding modern CCTV security systems. It is our goal to help users plan, install, and maintain surveillance systems in residential, business, or commercial applications.

Security Electronics Circuits Manual is an invaluable guide for engineers and technicians in the security industry. It will also prove to be a useful guide for students and experimenters, as well as providing experienced amateurs and DIY enthusiasts with numerous ideas to protect their homes, businesses and properties. As with all Ray Marston's Circuits Manuals, the style is easy-to-read and non-mathematical, with the emphasis firmly on practical applications, circuits and design ideas. The ICs and other devices used in the practical circuits are modestly priced and readily available types, with universally recognised type numbers. This title replaces the popular 'Electronic Alarm Circuits Manual'. Ray Marston has proved, through hundreds of circuits articles and books, that he is one of the leading circuit designers and writers in the world. He has written extensively for Popular Electronics, Electronics Now, Electronics and Beyond, Electronics World, Electronics Today International, Nuts and Bolts, and Electronics Australia, amongst others. · Easy to read guide to Circuits. · Practical approach to applications, circuits and design ideas. · From a well-known author in the electronics field.

Covers creating a home security plan, assessing local public safety agencies, planning a budget, alarm systems, home surveillance, and protecting a car.
