The SRA Verbal Test was a test of general ability, and measured an individual's adaptability and flexibility in problem solving. Due to its verbal nature, it was recommended only to be used with people who were very familiar with the English language. The results could be utilized in personnel placement or in educational placement.

Description The SRA verbal is a short test of general ability designed to measure adaptability. The items are of two types: Vocabulary (Linguistic) and Arithmetic Reasoning (Quantitative) Because these two item types measures separate mental skills and are presented in an interspersed format with a restricted time limit, the test presents a situation in which the individual must adjust rapidly from one item to another.

A Verbal Reasoning Test score is interpreted in a similar fashion to that to the other aptitude tests (numerical and abstract). A "pass" score for the verbal reasoning test doesn't exist. Instead your score is compared to a benchmark that based upon scores achieved by others at a similar organisational level and in a similar occupation to the one you are applying for.
