The Generic Surgical Sciences Examination (GSSE) is designed to ensure that candidates have demonstrated a minimum standard of knowledge in the surgical sciences of anatomy, pathology and physiology - the foundation of surgical training. Passing the GSSE requires demonstration of this 'minimum standard' of knowledge in each discipline as well as sound knowledge 'across the board'.

Generic Surgical Science Examination (GSSE) | RACS

This book is designed for Generic Surgical Sciences Examination (GSSE). This collection of questions and answers as well as short notes is intended to assist junior doctors in successfully sitting the GSSE. The questions are specifically designed to highlight key surgical anatomy, and are supplemented by images that replicate "spot-test" type questions.

The book is organized in 5 chapters, totaling 140 pages including colour images, diagrams and tables. This is an accompany book with Anatomy for the Generic Surgical Sciences Examination (GSSE), Springer, 2017, which is written by the same author.

Physiology for General Surgical Sciences Examination (GSSE ...

The Generic Surgical Sciences Examination is designed to demonstrate that the candidate understands anatomy, pathology and physiology at levels required for surgical training. All trainees are required to pass this exam in order to progress through the training program.

Examinations

The Surgical Science and Clinical Examination Committee has defined a comprehensive syllabus for the Generic Surgical Sciences Examination (GSSE) and Clinical Examination (CE). The GSSE multiple choice questions are wholly based on the subject matter in the syllabus. The syllabus covers the disciplines of anatomy, physiology and pathology.

What does the GSSE test? | RACS

The syllabus and the examination emphasise factors common to basic mechanisms of disease, recognising passive (essentially degenerative), reactive and neoplastic phenomena. General pathological phenomena include cell injury, adaptation and death, degenerations including atherosclerosis, pigmentation and calculus formation, alterations of growth, differentiation and function of cells and of age.
