The first scientist? The philosopher Anaximander was born in the trading port of Miletus in 610 BCE, and is said to have become a student of the philosopher Thales. He was fascinated by processes...

Philosopher File: Anaximander — the first scientist? | by ...

2,600 years ago, Anaximander became the first person in recorded history to recognize that the earth exists as a solitary body which does not need to rest on top of anything else. Fascinated by the structure of the earth, he produced one of the first ever maps of the world. He did not restrict his thinking to astronomy and geography.

Anaximander - Biography, Facts and Pictures

Who was Anaximander? Anaximander, a disciple of Thales of Miletus and a member of the Miletus school, was considered the first scientist in the world to use experimentation through the demonstrative method. He was a scientist who dedicated himself to searching the foundation of all things.

Anaximander | Who was, thought, contributions, arche ...

Carlo Rovelli, a leading theoretical physicist, uses the figure of Anaximander as the starting point for an examination of scientific thinking itself: its limits, its strengths, its benefits to humankind, and its controversial relationship with religion. Anaximander, the sixth-century BC Greek philosopher, is often called the first scientist because he was the first to explain that order in the world was due to natural forces, not supernatural ones.

Amanda Briney is a professional geographer. She holds an M.A. in geography and a Certificate of Advanced Study in Geographic information Systems (GIS). Anaximander was a Greek philosopher who had a deep interest in cosmology as well as a systematic view of the world (Encyclopedia Britannica). Although little about his life and world is known today he was one of the first philosophers to write down his studies and he was an advocate of science and trying to understand the structure and ...

Biography of Greek Philosopher Anaximander

Anaximander was the first astronomer to consider the Sun as a huge mass, and consequently, to realize how far from Earth it might be, and the first to present a system where the celestial bodies turned at different distances. Furthermore, according to Diogenes Laertius (II, 2), he built a celestial sphere.
