This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

Sport during Cold War has recently begun to be studied in more depth. Some scholars have edited a book about the US and Soviet sport diplomacy and show how the government of these two countries have used sport during this period, notably as a tool of "soft power" during the Olympic games. Our goal is to continue in this direction and to focus more on the sport field as a place of exchanges during the Cold War. Regarding this point, our aim is to show that there were events "beyond boycotts" many and that unknown connections existed inside sport. Moreover, many actors were involved in these exchanges. Thus, it is important not only to focus on the action of States, but also on private actors (international sporting

bodies and journalists), considering that they acted around sport (an "apolitic" field) as it was tool to maintain links between the two blocs. Our project offers a good opportunity for young scholars to present original research based on new materials (notably the use of institutional or personals archives). Morevoer, it is also a step forward with a view to conduct research within a global history paradigm, one that is still underused in sport academic fields.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This volume provides an accessible scientific introduction to the historical geography of Tropical Pacific Islands, assessing the environmental and cultural changes they have undergone and how they are affected currently by these shifts and alterations. The book emphasizes the roles of plants, animals, people, and the environment in shaping the tropical Pacific through a cross-disciplinary approach involving history, geography, biology, environmental science, and anthropology. With these diverse scientific perspectives, the eight chapters of the book provide a comprehensive overview of Tropical Pacific Islands from their initial colonization by native peoples to their occupation by colonial powers, and the contemporary changes that have affected the natural history and social fabric of these islands. The Tropical Pacific Islands are introduced by a description of their geological formation, development, and geography. From there, the book details the origins of the island's original peoples and the dawn of the political economy of these islands, including the domestication and trade of plants, animals, and other natural resources. Next, readers will learn about the impact of missionaries on Pacific Islands, and the affects of Wold War II and nuclear testing on natural resources and the health of its people. The final chapter discusses the islands in the context of natural resource extraction, population increases, and global climate change. Working together these factors are shown to affect rainfall and limited water resources, as well as the ability to sustain traditional crops, and the capacity of the islands to accomodate its residents.
