Complete coverage for Pit Bikes with 4-stroke air-cooled horizontal (lay-down) engines, specifically the Lifan semi-automatic IP52FMH, and 4-speed Lifan IP52FMI, Lifan IP56FMJ (YX140), Zongshen IP60YMJ (ZS155): --Routine Maintenance and servicing --Tune-up procedures --Engine, clutch and transmission repair --Cooling system --Fuel and exhaust --Ignition and electrical systems --Brakes, wheels and tires --Steering, suspension and final drive --Frame and bodywork --Wiring diagrams --Reference Section With a Haynes manual, you can do it yourself?¿from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the vehicle. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and hundreds of photographs that show each step. Whether you're a beginner or a pro, you can save big with Haynes! Step-by-step procedures --Easy-to-follow photos --Complete troubleshooting section --Valuable short cuts --Color spark plug diagnosis

A historical account of the development of engines, from Newcomen's and Watt's steam engines through the Daimler-Benz DB601. Discusses such aspects as piston and cylinder problems, engine life, cooling, compartments, and energy conservation. Well illustrated with photographs, drawings, graphs, and c

Models covered: CG 125, 124 cc

Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years.

The Pulitzer Prize-winning journalist and author of *Garbology* explores the hidden and costly wonders of our buy-it-now, get-it-today world of transportation, revealing the surprising truths, mounting challenges, and logistical magic behind every trip we take and every click we make. Transportation dominates our daily existence. Thousands, even millions, of miles are embedded in everything we do and touch. We live in a door-to-door universe that works so well most Americans are scarcely aware of it. The grand ballet in which we move ourselves and our stuff is equivalent to building the Great Pyramid, the Hoover Dam, and the Empire State Building all in a day. Every day. And yet, in the one highly visible part of the transportation world—the part we drive—we suffer grinding commutes, a violent death every fifteen minutes, a dire injury every twelve seconds, and crumbling infrastructure. Now, the way we move ourselves and our stuff is on the brink of great change, as a new mobility revolution upends the car culture that, for better and worse, built modern America. This unfolding revolution will disrupt lives and global trade, transforming our commutes, our vehicles, our cities, our jobs, and every aspect of culture, commerce, and the environment. We are, quite literally, at a fork in the road, though whether it will lead us to Carmageddon or Carmaheaven has yet to be determined. Using interviews, data and deep exploration of the hidden world of ports, traffic control centers, and the research labs defining our transportation future, acclaimed journalist Edward Humes breaks down the complex movements of humans, goods, and machines as never before, from increasingly car-less citizens to the distance UPS goes to deliver a leopard-printed phone case. Tracking one day in the life of his family in Southern California, Humes uses their commutes, traffic jams, grocery stops, and online shopping excursions as a springboard to explore the paradoxes and challenges inherent in our system. He ultimately makes clear that transportation is one of the few big things we can change—our personal choices do have a profound impact, and that fork in the road is coming up fast. *Door to Door* is a fascinating detective story, investigating the worldwide cast of supporting characters and technologies that have enabled us to move from here to there—past, present, and future.

The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, *Wikinomics* has become essential reading for business people everywhere. It explains how mass collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive *wikinomics*, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles.

5000 Miles At 8000 RPM is the story of how CSC Motorcycles brought the Zongshen RX3 250cc adventure touring motorcycle to America, including detailed, behind-the-scenes reports on Zongshen's manufacturing and quality assurance, the US Environmental Protection Agency and California Air Resources Board certification processes, CSC's dealer-free path to market, and the planning and execution of CSC's customer-centered adventure touring approach. The book includes detailed tales from the 1700-mile CSC Inaugural Baja Run and the 5000-mile Western America Adventure Ride, along with a no-holds-barred review of the RX3's strengths and weaknesses. *5000 Miles At 8000 RPM* includes more than 70 color photographs. If you are a motorcycle enthusiast, this book is one you don't want to miss!
